

# Eastboard Consoles

## PROJECT DETAIL

WTXF Fox  
Philadelphia PA

For WTXF, we built two identical production control rooms with custom monitor walls, a two-position master control console, media prep, TOC, and the News Assignment desk. Ten edit suites were fitted with our EDITOP/34 consoles; three edit suites were custom-built. All worksurfaces were fabricated from solid surface materials. The many special features included illuminated accent panels, built-in power and data connections, and our trademark continuous brush grommets.
